

## NEW PRODUCT SHOWCASE

## One-Step & Two-Step Solvent Cements

IPEX has made a significant change to the current solvent cement products to be used with AquaRISE® hot and cold potable water distribution systems.

The product offering has been modified to now offer two customized solvent cements for small and large size ranges. Both products are certified to CSA B137.6, listed to NSF 61 and sold as a kit coming complete with necessary applicators and installation instructions.

### Features & Benefits:

- Faster installation in smaller sizes
- Customized products for each size range
- All proper applicators included in kits
- Full instructions provided to installers
- Optimum solvent welded joints will result

### ONE-STEP Cement Kit

- Mandatory for sizes 1/2" – 2"
- No primer required
- Light yellow in colour
- Medium body
- Available in 473 ml (pint), 946 ml (quart) and 3,785 ml (gallon) can sizes

### TWO-STEP Cement Kit

- Mandatory for sizes 2-1/2" – 4"
- Kits provide 946 ml (quart) cement and 473 ml (pint) primer or 3,785 ml (gallon) cement and 1,892 ml (4 pints) primer
- Heavy body cement
- Cement colored dark yellow
- Primer is clear
